

Avid Quality Group

Windsor, Ontario

Subject: Testimonial

London, Ontario, June 17, 2009

To whom it may concern:

Over the past two years, Diamond Aircraft has frequently employed the AVID QUALITY GROUP to perform precision measurements on components for our Piston Aircraft and to render help and assistance during the development of the D-JET program. This service entailed measurements for both, Tooling and Aircraft Parts, for the Piston Aircraft Series and mainly tooling for the D-JET program, employing a Laser Tracker.

Although Diamond Aircraft operates its own Laser Tracker, the Avid Quality Group was employed initially to perform measurements in peak times, when deadlines exerted undue pressure and outside help was called for, but also when Diamond Aircraft's own laser tracker could not handle the growing demand and/or when extraordinary measures needed to be employed.

It soon became apparent that the representatives from the AVID Group not only performed flawlessly and quickly, they also freely shared their knowledge. We soon began to appreciate their expertise and the competency displayed when new and innovative ways were called for to solve difficult measurement tasks, including the scanning of large moulds (up to 38 feet in length) and the translation of that data into 3D solids (the latter employing the help of third party professionals).

All work for Diamond Aircraft was performed in the shortest time possible, with absolute precision and undeniable expertise and with the operators employing a friendly and co-operative professional demeanor towards Diamond Aircraft employees.

All services also included the creation of specific measurement reports, which were produced promptly and with professional expertise – a bonus when dealing with certification procedures and related conformity demands.

We will continue to employ the services of the AVID Quality Group, whenever the need occurs and can only recommend their credo of maintaining unremitting quality to any customer requiring prompt and thoroughly professional help and expertise.

**Udo Hanemann**

Manager, D-Jet Tooling and Manufacturing Development
